Diamond Systems Announces End of Life for Emerald-MM-DIO 4 Port Serial Plus 48 Digital I/O Line PC/104 I/O Module

Due to end-of-life components on the Emerald-MM-DIO serial I/O module, Diamond Systems is making obsolete the EMM-DIO-XT.

Diamond Systems has a limited number of EMM-DIO-XT products on-hand. Fulfillment of any future order is limited to stock on hand. Orders will be filled on a first come, first served basis. In order for us to fulfill your orders for the EMM-DIO-XT, orders should be placed with Diamond Systems as soon as possible. Only a firm order will guarantee the availability of this product to meet your needs. Once the stock on hand has been exhausted, no further EMM-DIO-XT orders will be accepted.

Replacement Products

For future needs, customers should order one or both of the following products to satisfy the functionality found on the Emerald-MM-DIO.

For 4 serial ports, customers should order the Emerald-MM-4M-XT 4 serial port I/O module available from Diamond Systems. The EMM-4M-XT serial ports are a fully compatible upgrade for the EMM-XT.

For the DIO functionality, customers should order the Onyx-MM-DIO 48 DIO line module available from Diamond Systems. The OMM-DIO-XT has the same basic digital I/O features of the EMM-DIO-XT, but does not offer the interrupt on change of state feature.

EMM-4M-XT Emerald-MM 4-channel RS-232/422/485 ports, extended temperature

OMM-DIO-XT Onyx-DIO 48 line digital I/O module, extended temperature
