End of Life Notice

24th January 2012

Dear Valued Customer:

GE Intelligent Platforms continues to demonstrate its commitment to world class industrial computing platforms with recent new product introductions, including the world class harsh environment Wolverine III industrial PC. The Wolverine III is the first of several new industrial PC, Operator Interface and PLC/PAC products designed around GE Intelligent Platforms rugged COMexpress platform, which delivers world-class performance, reliability, and upgradeability.

With the introduction of these new products, GE Intelligent Platforms is announcing the end of production of several older product lines. While we believe the new platforms we are introducing will offer our customers improved performance and reliability, we do recognize these changes may impact those customers who have been purchasing the products we are discontinuing. The following bulletin provides information regarding last-time buy opportunities and long-term support options for the products being discontinued.

This letter is notification that effectively ALL Computer Dynamics (CDI) product excluding the Wolverine III will be taken to EOL status. This includes all Display-PAC and VAMP Product Families including:

- PAC-RPP, PAC-WN, PAC-OPR
- VAMP-RPP, VAMP-WN
- Nd series products
- Balefire, Sentinel, and SealTouch

Products already sold will be covered under our agreed upon warranty terms and conditions.

Last-time buy orders can be placed on a non-cancellable, non-returnable basis and orders will be accepted until February 29, 2012. Last-time buy orders for this product will be fulfilled thru April 27, 2012.

As a valued customer, your needs are our top priority. We are committed to ensuring a smooth transition for you and your business. For further information, please contact your local GE Intelligent Platforms sales person or GE IP Customer Care at 1-800-433-2682.

Regards
